Attention: Farm Operations Manager

Veterinarian

Our client, located adjacent to the Coonawarra Wine Region in the South East of South Australia is a leading provider of artificial breeding services. They are seeking an energetic individual with the ability to work autonomously to assist their rapid growth. Working primarily in the sheep and cattle industries the role involves artificial insemination, embryo transfer, freezing and storage, semen collection, freezing and storage, client liaison and the requisite record keeping.

The successful applicant will have the opportunity to work with cutting edge reproduction technology and with Australia's premier breeders to further develop their technical skills and knowledge.

With respect to personal attributes the applicant:

- will be physically able to undertake the duties required
- is trustworthy, honest, responsible & reliable
- can communicate effectively and have a willingness to learn
- has flexibility in respect to work times during busy periods
- exhibits a positive attitude and appropriate sense of humour
- requires a current drivers license
- is a non smoker
- must be able to maintain and respect business confidentiality

Excellent communication and organisation skills are a prerequisite.

An appropriate remuneration package will be negotiated with the successful candidate.
